

# Hands on AI Vision

at the edge

## Executive Summary

This document provides a high-level overview of the project's goals, objectives, and key findings. It is intended for stakeholders who are interested in the overall direction and outcomes of the project.

The project aims to explore the potential of AI vision technology in the context of smart cities and urban infrastructure. The primary focus is on understanding the challenges and opportunities associated with implementing such systems at the edge.

## Create your Azure free account

An Azure free account gives you access to explore capabilities and develop proofs of concept. Your account also includes:

-  \$200 credit to use in your first 30 days
-  Free monthly amounts of 20+ popular services for 12 months
-  Free monthly amounts of 65+ always-free services
-  Spending protection—your credit card won't be automatically charged until you move to pay-as-you-go pricing
